Easy! Software announces the release of Easy!Flow v10.1 on April 15, 2010.

Easy!Flow[™] is an integrated project management and development process management solution. It seamlessly integrates project management, requirement management, change management, issue tracking, configuration management, document control, quality assurance and peer review functions into a team-oriented collaboration tool. It improves team productivity and product quality, as well as shortens project release cycles.

What's New in Easy!Flow v10.1

- Requirement Management Functional Module:
 - a. *This is an optional add-on module for Easy!Flow and Easy!TTS Pro.*
 - b. *All requirement-related activities are conveniently accessible from one well organized screen.*
 - c. *Requirement Objects of a release, contained in a specified folder, or from a pre-defined query result are presented in a hierarchical tree grid view. Displayed properties (status, deadline, assignee, etc.) of the requirement objects are customizable by each user.*
 - d. *Detailed requirement object view is presented in a separate pane next to the tree grid for convenient access also is tabbed to accommodate multiple requirement objects access.*
 - e. *Requirement specification can be entered:*
 - i. *directly via the requirement description pane*
 - ii. *by attaching the requirement documents to the requirement object*
 - iii. *associating the version controlled requirement documents to a requirement object*

To learn more about the requirement management, please refer to:

http://www.ez-sw.com/EZ_RM_Detail.html.

- Rich Text editor option for editing ticket description.
- Add calendar and multiple dropdown selections to the customized field.
- Ticket cloning includes customized fields.
- Implemented PM Gantt task sort id to accommodate new task insertion that preserves task position.
- In PM Gantt, add a new (right-click) dropdown menu item, which allows users to create a new ticket that is associated with the task.
- "Ticket Tip" (a tool-tip like pop-up to capture key info about a ticket) to PM Gantt ticket field.

Easy!Flow Release Notes

- “Resource” dropdown list is sorted alphanumerically in PM Gantt, and its operation is now more intuitive and easier.
- The query result output now can be customized by each user for the displayed columns and their order.
